

The strongest link in your network

Unmanaged Ethernet

- High-quality, advanced design
- Many fiber & copper port options
- Industrial operating temperature rating

Process Control

- Extremely reliable plug & play operation
- Up to 26 ports available
- Advanced monitoring & management options

Media Converters

- Copper to fiber communication
- 100Base & 1000Base models
- Industrial operating temperature rating

Managed Ethernet

- Extended environmental specifications
- Ring redundancy technology
- Advanced monitoring & management capability
- Up to 6 fiber ports—numerous port configurations available

Wireless Access

- Data bandwidths up to 300 Mb/s
- 802.11a/b/g/n wireless compliance
- IP67 option
- -40°C to 70°C operation

PoE Industrial Power over Ethernet

- Exceptional performance
- Midspan, endspan and splitter models available
- -40°C to 85°C operation
